I think it is fine to do two separate calls. I'm guessing that one of the conversations might run longer than 30 minutes. I just wanted to let you know.

Yes, it looks like the other meeting relates to new work Paula is leading on advanced (ie chemical) recycling technologies, which is wholly separate from what I think we were going to discuss. I wonder though if there is an interest in creating a single 1-hr meeting with half dedicated to our infrastructure fund and research and the other half dedicated to advanced recycling - what do you think?

Hi Paula,  
we look forward to the conversation.

It looks like December 2 from 1-2pm EST works best for our team, with December 3 from 1-2pm EST as a backup if December 2 doesn't work.

We'll look for the meeting invite and understand that any documents received are not to be shared.

Best,

Nathan Wittstruck

Thanks for the introduction, Ellen.

And great to meet you Nathan, Vance, Kimberly, Pricilla, Rachelle, and Jarrod. I'm free from 12-2pm EST anytime from Nov 30th to December 3rd.

Is there a day/time there that works with the whole group? I can send a Zoom invite, if so.

Will send a pre-read, under embargo, for your review before our meeting.

Looking forward!

Paula

Hi all,

It's my pleasure to introduce you to Paula Luu (cc'd). Paula is leading the Closed Loop study and can share more. I'm excited to hear your thoughts on the findings after Thanksgiving. (And shame on me for not realizing that America Recycles day is fast approaching!)

Best,

Ellen

Hi Ellen,

Thanks for reaching out! There's a lot of interest in the research into advanced recycling, so I've included a small group that would all like to be invited.

Due to our office's America Recycles events on November 16-17 (<https://www.epa.gov/americanrecycles/epas-2020-america-recycles-innovation-fair>), I think it would be best to meet after the week of Thanksgiving. Can your team meet the week of November 30? If there's anything you'd like us to review in advance, please send it over. We understand if the research is still draft and is not yet ready for sharing.

Best,

Nathan Wittstruck

**Subject:** Question on resources for advanced recycling operations

Hi Nathan,

Thanks for your engagement on the Circulate Capital GHG model. I'm excited to see how the tool evolves in the coming months!

On a totally separate topic: I am advising Closed Loop Partners on an analysis of advanced recycling technologies (i.e., conversion, decomposition and purification), including environmental impacts. We've just completed an environmental and human health impact analysis, and I was wondering if you or someone at EPA would be interested in talking with the Closed Loop team about the findings. I think it would be great to get EPA's perspective on these specific technologies within the framework of US regulation and common measures of environmental and health impacts.

Let me know who would be best placed to have a conversation, and I'd love to facilitate an introduction.

Thank you!

Ellen
